As a member of the Center for Science in the Public Interest (CSPI), I urge you to save human lives by banning the use of medically useful antibiotics in animal feed. Adding antibiotics to feed in order to promote growth can make bacteria resistant to those antibiotics. And that can leave physicians with no way to treat life-threatening bacterial infections in humans. That's why I support the petition filed by CSPI.

DDT Traveled the entire food chain
~~and~~ and caused a great deal of damage -
Remember "Silent Spring" I also would
like to see the growth hormones banned
from feed for animals for the same
reasons. I think that's why we have
so many overweight Sloppy fat young
people today

Thank you

William A. Donze
